

(a) Setup

first-visit frame

road-sign crop / visual cue

(b) Write/store

crop path

feature vector

metadata

External memory

inference-time storage

(c) Generate candidates

Frozen MatrixGame-2

candidate_seed1

...

candidate_seed8

same candidate pool before reranking

(d) Read by patch matching

best local patch

Regular grid patches

Feature encoder

Cosine similarity

Best local patch

(e) Rerank candidates

No memory: seed1

With memory: seed8

seed1 -> seed8

selected output changes
