

Main result: no-memory seed 1 vs approved-memory seed 8

Frozen Matrix-Game-2 keeps the same candidate pool; external memory only changes selection.

PPT-ready comparison

No training

Selection only, no internal model change

Seed 1

No-memory selection

Selected continuation without external memory

The frozen model picks seed 1.

External memory
changes selected
output

Seed 8

Memory-guided selection

Selected continuation after approved road-sign memory

The same candidate pool is reranked and seed 8 wins.

This is a selection comparison, not a new rollout, new training run, or checkpoint modification.
